

Aluminum Fence Designs

At Access Gates and Doors we take pride in offering top of the line aluminum modern fences and gates that are lifetime lasting with easy installation and maintenance free.

THE All Access Control Gates STORY

We have spent years coming up with a perfect design for our fences and gates. Using the best materials and finishes. Our main focus is to have a maintenance free, durable and affordable fence. The Access Gates and Doors team has been successful in obtaining both design and utility patents.

MADE IN USA

We make every piece of our Aluminum Residential Fence at Access Gates and Doors in the United States of America. We offer top quality fences and gates in wide variety of traditional and modern design. Our residential fences and gates collection are all pure aluminum products. All of them are customizable extruded powder-coated aluminum, customized according to your requirements.

POWDER COATING

Powder Coating is an advanced method of applying a decorative and protective finish to the metal. The powder-coating process is a mixture of finely crushed particles of pigment and resin, then we sprayed electrostatically onto the surface. The result is a uniform, durable, high quality, and attractive finish.

PRE-FABRICATED PROFILES

We make pre-fabricated aluminum profiles for any kind of gate or fence project. Our profiles have a wall thickness of 2mm, made from aluminum 6061 T6, this gives our fences and gates high durability, strength and lifetime lasting. All parts are finished with the best quality American made powder.

ENDLESS DESIGNS

At Access Gates and Doors, fencing truly is our passion. It is the first thing visitors see and we believe fencing and gates should be both sturdy and stunning. Our patented system allows for both. We provide long-lasting modern fencing and gates that are affordable and easy to install, with all the benefits our customers deserve. With it's unique horizontal design, our powder-coated aluminum fencing is incredibly light weight and is engineered to be easily customizable, providing our customers with a broad range of elegant designs for full or partial privacy.

Our aluminum fence is made out of 4 different aluminum profiles. The profiles come powder coated and ready to install. You can build over 100 different styles without any welding, screws or special tools. Looks identical from both sides.
